Work Experience

Azure PaaS Support Engineer - Microsoft

Working on the ARM team in the EMEA region, supporting strategic customers in resolving issues that occur in the Azure Resource Manager layer of Azure, including resource deployments, Bicep, Terraform, Policy and PowerShell modules related to resource management. *Azure, Bicep, Terraform*

May 2022 - Present

Front-End Developer - Hitachi Solutions Europe, Ltd.

Lead the development of a Word Add-In that pulls data from Azure DevOps and Dynamics for CRM and generates it in the standardized format for Iteration Backlog and Build documents and contributed to the increase in efficiency when producing these deliverables. *Typescript, Vue.js, Node, Azure APIs*
Maintained and expanded the company's internal website. The platform is used to display relevant information within the business, as well as a support center to raise issues to relevant departments, e.g., HR. *Typescript, Vue.js, Tailwind*

Aug 2020 - Apr 2022

Built an admin platform that enabled upper management to manage resources shown in the company's internal website. The admin center consists of a simple CRM interface which displays internal tickets raised by workers and documents to display on the website. *Typescript, Vue.js, Azure Storage Tables*

Worked on an iteration of a form-building extension sold by the company as an add-on to CRM projects. The field types I helped add to the tool included a Bing Maps location selection control and a web call field that uses customizable hooks to pull data from a specific endpoint. The tool offers a display rule functionality for fields, which I contributed in reworking to accommodate the new field types. *Typescript, Express.js, Vue.js, Tailwind*

Dynamics 365 Technical Consultant for CRM - Hitachi Solutions Europe, Ltd.

Worked on a readily-deployable Public Housing solution following common governmental processes in the UK. *Microsoft D365 for CRM, JavaScript, C#*

Sep 2019 – Jul 2020

Education

BSc + MSc Electrical and Computer Engineering - FEUP

Field of Telecommunications, Electronics and Computers
Specialized in Multimedia and Communications

Sep 2014 – Mar 2022

Projects

🔗 ▶ **YouTube Accelerator** - A Google Chrome extension that adds a component that sets the playback rate of YouTube videos. Usable via both UI and Keyboard interface. *HTML, CSS, JavaScript, Google Extension API*

Jan 2022 - Present

🔗 **An Analysis of Performance Recipes with C Applications (Master's Dissertation)** - Profiled performance hotspots in High-Performance and Embedded systems and refactored code to improve execution times, energy consumption and cache utilisation. *C, GPROF, Linux Shell, LARA: JavaScript Based Language*

May 2020 – Apr 2021

🔗 **Portfolio** - A static web page detailing information about me, contacts and experience. *HuGo/HuGo themes, HTML, CSS, GitHub Pages, GitHub Actions*

Sep 2018 - Present

Certifications

Microsoft Azure Fundamentals, AZ-900, granted by Microsoft. *Azure, Cloud Computing*

Jul 2022

Back-End Development and APIs, granted by Free Code Camp. *Express.js, MongoDB*

Aug 2021
